

Pugazhenthiran C

Lead Software Engineer with 7+ years of experience designing and building scalable enterprise web applications using React, Ember, TypeScript, and modern frontend technologies. Proven track record of leading feature development, improving engineering productivity through AI-assisted development, and delivering high-quality software with a focus on performance, accessibility, and maintainability.

Work Experience

Lead Software Engineer, Freshworks

Oct 2024 - Present

- Leveraged AI-assisted development workflows to accelerate feature delivery by 40% while maintaining production quality.
- Achieved 95% test coverage through comprehensive Playwright testing.
- Automated document workflows, reducing 70% manual effort across teams.
- Developed reusable Table and Timeline component libraries, reducing implementation time across multiple product teams.
- Implemented accessibility enhancements (WCAG 2.1) across the product suite.
- Mentored junior engineers and contributed to sprint planning and code reviews.
- Migrated legacy jQuery modules to modern React components.
- Implemented Playwright visual regression testing, reducing UI regressions before production releases.

Senior Software Engineer, Tekion

Jan 2022 - Oct 2024

- Built CRM and account management systems serving 1000+ dealerships.
- Developed 'Live User Sentiment' app with real-time WebSocket updates.
- Implemented micro-frontend architecture enabling independent team releases.
- Automated dealer ranking and task creation, achieving 4x faster actions.
- Optimized bundle size by 35% through code splitting and lazy loading.
- Led migration from monolithic to modular frontend architecture.
- Mentored team members and led end-to-end development cycles.

Software Engineer, TCS

Oct 2018 - Nov 2021

- Developed UI components using React class components and Ant Design.
- Implemented infinite scrolling for improved UX on large datasets.
- Improved application responsiveness through AJAX optimizations.
- Practiced TDD with Jest and followed CI/CD deployment pipelines.
- Collaborated in Agile sprints with cross-functional teams.
- Reduced page load time by 25% through component optimization.

Skills

Languages and Frameworks

React, TypeScript, JavaScript (ES6+), Ember.js, Redux, HTML5, CSS3, SASS, Tailwind CSS, NodeJs, Python, ROR

Architecture

Micro-frontends, Module Federation, Design Systems, Component Libraries, Accessibility (WCAG), Performance Optimization

Testing

Playwright, Jest, Cypress, React Testing Library

Developer Tools

Git, CI/CD, Webpack, Vite, Docker

AI & Developer Productivity

AI-assisted Development, GitHub Copilot, Cursor, MCP, Prompt Engineering

Projects

AI Automation Script Generator

Built an LLM-powered tool to generate automation scripts, reducing QA effort by 50%.

Education

Bachelor of Engineering

(Electronics & Communication)

CEG, Anna University (Aug 2014 – Apr 2018)

Achievements

- Won internal hackathon competitions.
- Recognized as Top Performer (Tekion).
- Received multiple internal awards for excellence.
